Dear Sir/Madam

The National Board has proposed key changes to the Scope of practice registration standard. I write to express my concern with a number of proposed changes.

Would you let your children be treated unsupervised, by someone with no certified license, no medical training and a 3 year oral health degree, or backyard apprenticeship or night school?

Most other countries have a 6 year dental master's degree in dental science, in order to qualify to be dentists. This is a economically driven proposal, and not in the best interests of public safety.

Yours faithfully

David Le
