Subject: feedback scope of practice registration standard
Date: Monday, 17 June 2013 2:58:26 PM

Good Day,

1. Do you agree that the revision to the standard will provide greater clarity and certainty for dental practitioners to work within their scope of practice? (Why or why not?)

Certainly agree, each dental practitioner should have standard to scope of practice and a list of credentials and privileged to procedures that can be performed efficiently.

2. Do you agree that the introduction of the guidelines further supports this clarity for dental practitioners and the public? (Why or why not?)

Certainly, agree, this should includes Protocols and Policies guidelines (PPG) and Clinical and Procedures guidelines (CPG) in each practice.

3. Are there additional factors which could be included in the guidelines to support the standard?

Sure, Manuals, seminars, online Q&A and CPD.

4. Do you agree with the list of skills in the guidelines relating to programs to extend scope? Are there additional skills which the National Board should consider adding to the list?

Yes I do, and I believe that limitations should be applied on orthodontics treatment and implants to the General dentists unless they show yearly CPD or hands on courses.

5. Does the preferred proposal balance the need to protect the public with the needs of regulating the profession? (Why or why not?)

Yes I do, implementing duty of care to protect the public from unsafe practice dentistry.

Regards,
Baker Hamdi
